Your perfect shower

Terms and Conditions: 1. This promotion is open to all UK, CI, IOM and ROI residents, excluding employees of Kohler Mira, their immediate family members or anyone else professionally connected with the promotion. Also excludes wholesalers, plumbers & builders merchants and all other Mira shower stockists. 2. The prize is any shower found in the brochure excluding all trays, enclosures, wall panels and other products that are featured on our website. 3. The draw will take place on 30th July 2010. 4. No cash alternative or gifts are available, except that the models promised may be changed during the life of the promotion. The promoter cannot guarantee which models you will receive. 5. The promoter reserves the right to substitute alternatives of equal or similar value, if circumstances beyond our control mean that the stated items become unavailable. 6. The promoter is Kohler Mira Ltd, Cromwell Road, Cheltenham, Gloucestershire, GL52 5EP registered in England No.252115. 7. The prize winner will be drawn under independent supervision and notified by e-mail, telephone or post within 28 days of the closing date.

Approval Marques

Assesses products for compliance with regulation 4 of the Water Supply (Water Fittings) Regulations 1999.

Awarded by the BEAB to products which have been evaluated against the highest European and International standards.

Awarded by the BEAB to products which have been additionally tested on performance relating to application in the care sector.

Developed by the BMA to raise awareness of bathroom products that when installed and used correctly use less water and save energy.

Waterwise is the leading authority on water efficiency in the UK. Every year they award their Marque to products that cut back on wasted water.

Shows that the product has been endorsed by the Royal National Institute of Blind People (RNIB).

Certifies Type 2 thermostatic mixing valves for the domestic market to promote the safe use of hot water, with the immediate focus on social housing.

Here at Mira, it's the details you care about that we care about. Whatever we do, from pioneering the latest technology to breaking the mould with innovative designs, it's all to make your showering experience the very best it can be. Now, some might think "a shower is a shower" but, we think differently. We understand that your shower is part of your daily routine. You rely on it, relax in it and trust it. You want to be proud of it, amazed by it and cleansed by it - sometimes physically, sometimes emotionally. We understand that not all showers are the same and that not everyone wants the same things from a shower. But, most importantly, we believe in the one thing we all want - *Showering perfection*

What's your idea of the perfect shower?
Well, we've got showers that will clean and refresh you - a whole host in fact. But most people want more than that. So, we've also got showers with digital timers that keep you from being late for work. Showers with glass fascias that send your friends green with envy. And, showers with remote controls for when you just want 5 more minutes in bed.
But it doesn't end there. We've got showers that look after the environment by saving up to 75% water. Showers that are breaking the mould with nifty little designs. And, showers with thermostatic controls that keep your little ones safe.
Quite simply, we've got a shower for every body.

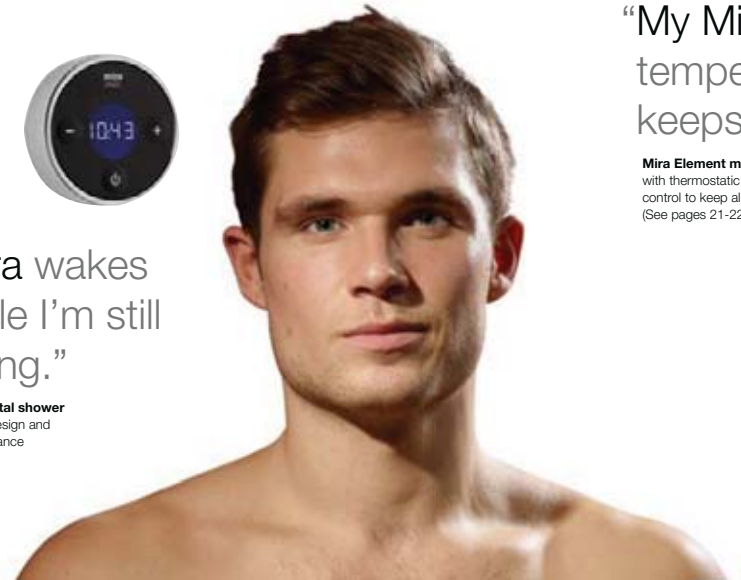
Functional?
Stylish?
Clever?
Extra safe?
Or all of the above?

"My Mira not only looks beautiful, it keeps me looking beautiful too."

Mira Azora electric shower
with stunning looks
and great features
(See page 86)

"My Mira wakes up while I'm still snoozing."

Mira Platinum digital shower
with cutting-edge design and
unbeatable performance
(See pages 57-58)



"My Mira keeps an eye on the temperature, while my mum keeps an eye on me."

Mira Element mixer shower
with thermostatic temperature
control to keep all the family safe
(See pages 21-22)

Why we're still No.1 after over 70 years.

For almost three quarters of a century we've been designing, developing and building showers. To have been this successful for this long isn't all down to luck, it's also down to good old fashioned hard work.

We've always been a forward-thinking company

Since 1921 we have been leading the way in the UK showering market. Today, as part of the American family-run Kohler Co., we're doing exactly the same. By producing showers that constantly go above and beyond traditional showering, we have set a benchmark for quality that few can claim to match.

We think the future of showering is always just one idea away.

We're perfectionists so we're always striving to make things better. That's why our groundbreaking Research and Development teams are constantly developing innovative designs and new ways to make your showering experience even more pleasurable.

We test, test and test again

We've got a reputation that's second to none – and we'd like to keep it that way. So, when it comes to testing our showers, we really put them through their paces. Every single shower undergoes a rigorous set of tests including a pressure test, to make sure there are no leaks, and a check against its product specification.

We make things easy for you

Even in the simplest of showers, there's a whole host of complex technology on the inside. But on the outside, we design every Mira shower to be easy to choose, easy to use and easy to fit. So, while we concentrate on the techy bit, you just relax and enjoy the perfect shower, every time.

We save water and care for the environment

You probably already know that taking a quick shower rather than having a bath helps to save water. But, did you know you could do even more for the environment thanks to our water-efficient products? We've even won awards for them! You can find more information on these products by simply turning to pages 185-186.

First for Thermostatic

Way back in 1937 we developed the world's first thermostatic shower. Designed to bring safe and reliable showering to hospitals and schools by stabilising the water temperature, this revolutionary mixer instantly set the standard. Then, in 1959, we took it one step further by unveiling the first thermostatic mixer designed specifically for the UK home.

We're here if you need a helping hand

Choosing a shower can be a confusing process. But fear not, we're here for you every step of the way. For a start you'll find a whole host of helpful advice on our website, www.mirashowers.co.uk, where you can check specifications, compare showers and even download installation guides for all our products. However, if you'd rather speak to someone directly, just give us a call on **0844 571 5000** – we're always happy to help.

Need more help?
Call 0844 571 5000
www.mirashowers.co.uk

Choosing your shower

Step 1: What kind of water system do you have?

Low pressure gravity system

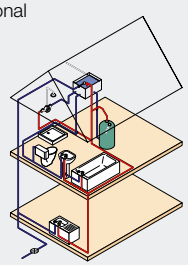
Low pressure

You'll know you have this system if:

There's a cold water tank in your loft and a hot water cylinder in your airing cupboard.

We recommend:

- Mixer showers (with optional pump for stronger flow)
- Digital mixer showers
- Power Showers



High pressure - mains pressure combination boiler

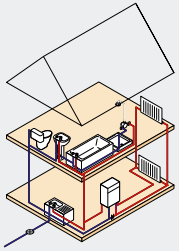
High pressure

You'll know you have this system if:

You have a boiler the size of a small kitchen cupboard somewhere in your house – you won't have hot and cold water tanks.

We recommend:

- Mixer showers
- Digital mixer showers
- Energy-saving Eco showers



High pressure - mains pressure unvented

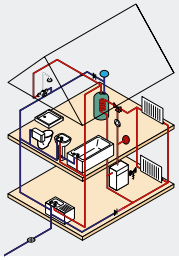
High pressure

You'll know you have this system if:

You have a hot water cylinder in your airing cupboard but no cold water tank in your loft.

We recommend:

- Mixer showers (for a powerful flow)
- Digital mixer showers (for a powerful flow)
- Energy-saving Eco showers



Cold mains supply

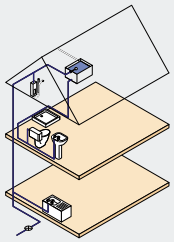
Cold mains

You'll know you have this system if:

You don't have stored hot water at all or, don't want to use up all the hot water when you have a shower.

We recommend:

- Electric showers (the higher the kW the stronger the flow)
- Pumped Mira Elite ST for low pressure cold water supplies



At a glance

All systems — **Compatible with all systems.**

High pressure — **Mains pressure combination boiler. Mains pressure unvented. Low pressure gravity with pump.**

Low pressure — **Low pressure gravity system.**

Cold mains — **Cold mains supply only.**

Step 2: What type of shower do you need?

If you're replacing a shower and you don't want to re-tile, it's worth checking the position of the hot and cold water pipes and the shape and size of the replacement shower. That way you'll be sure that the new shower fits over the old screw holes and onto the pipework. To make life easier, some of our mixer showers have adjustability on the inlet pipe centres.

Mixer showers

Mixer showers take water from both your hot and cold water supplies and mix it to create your ideal temperature.

- Powerful flow with high pressure systems
- Optional Mira Enduro pump for low-pressure systems
- Range of styles and sizes
- Choice of temperature control – manual, pressure balanced or thermostatic
- Most mixers work on all water systems

Digital mixer showers

Digital mixers take water from your hot and cold supplies and mix it together. The digital technology ensures you enjoy the exact temperature, every time.

- Stabilises temperature digitally
- Additional warm up and lock off modes
- Easy to install
- Mixer unit can be mounted away from the shower, such as in the loft
- Reduced pipework

Electric showers*

Electric showers take water from your cold water supply and warm it by passing it safely over heating elements contained within the unit.

- Works even if your boiler fails
- Works without the need for stored hot water
- All our electric showers are approved as water efficient because they use less water
- The pumped Mira Elite ST is available for low pressure systems

Power showers

Power showers take water from the stored hot and cold water supplies and mix it together to create your ideal temperature. All-in-one power showers have an in-built pump which also boosts the flow of water.

- Choose either an all-in-one or mixer shower and pump combination
- Perfect for homes with plenty of hot water
- Not suitable for high pressure systems

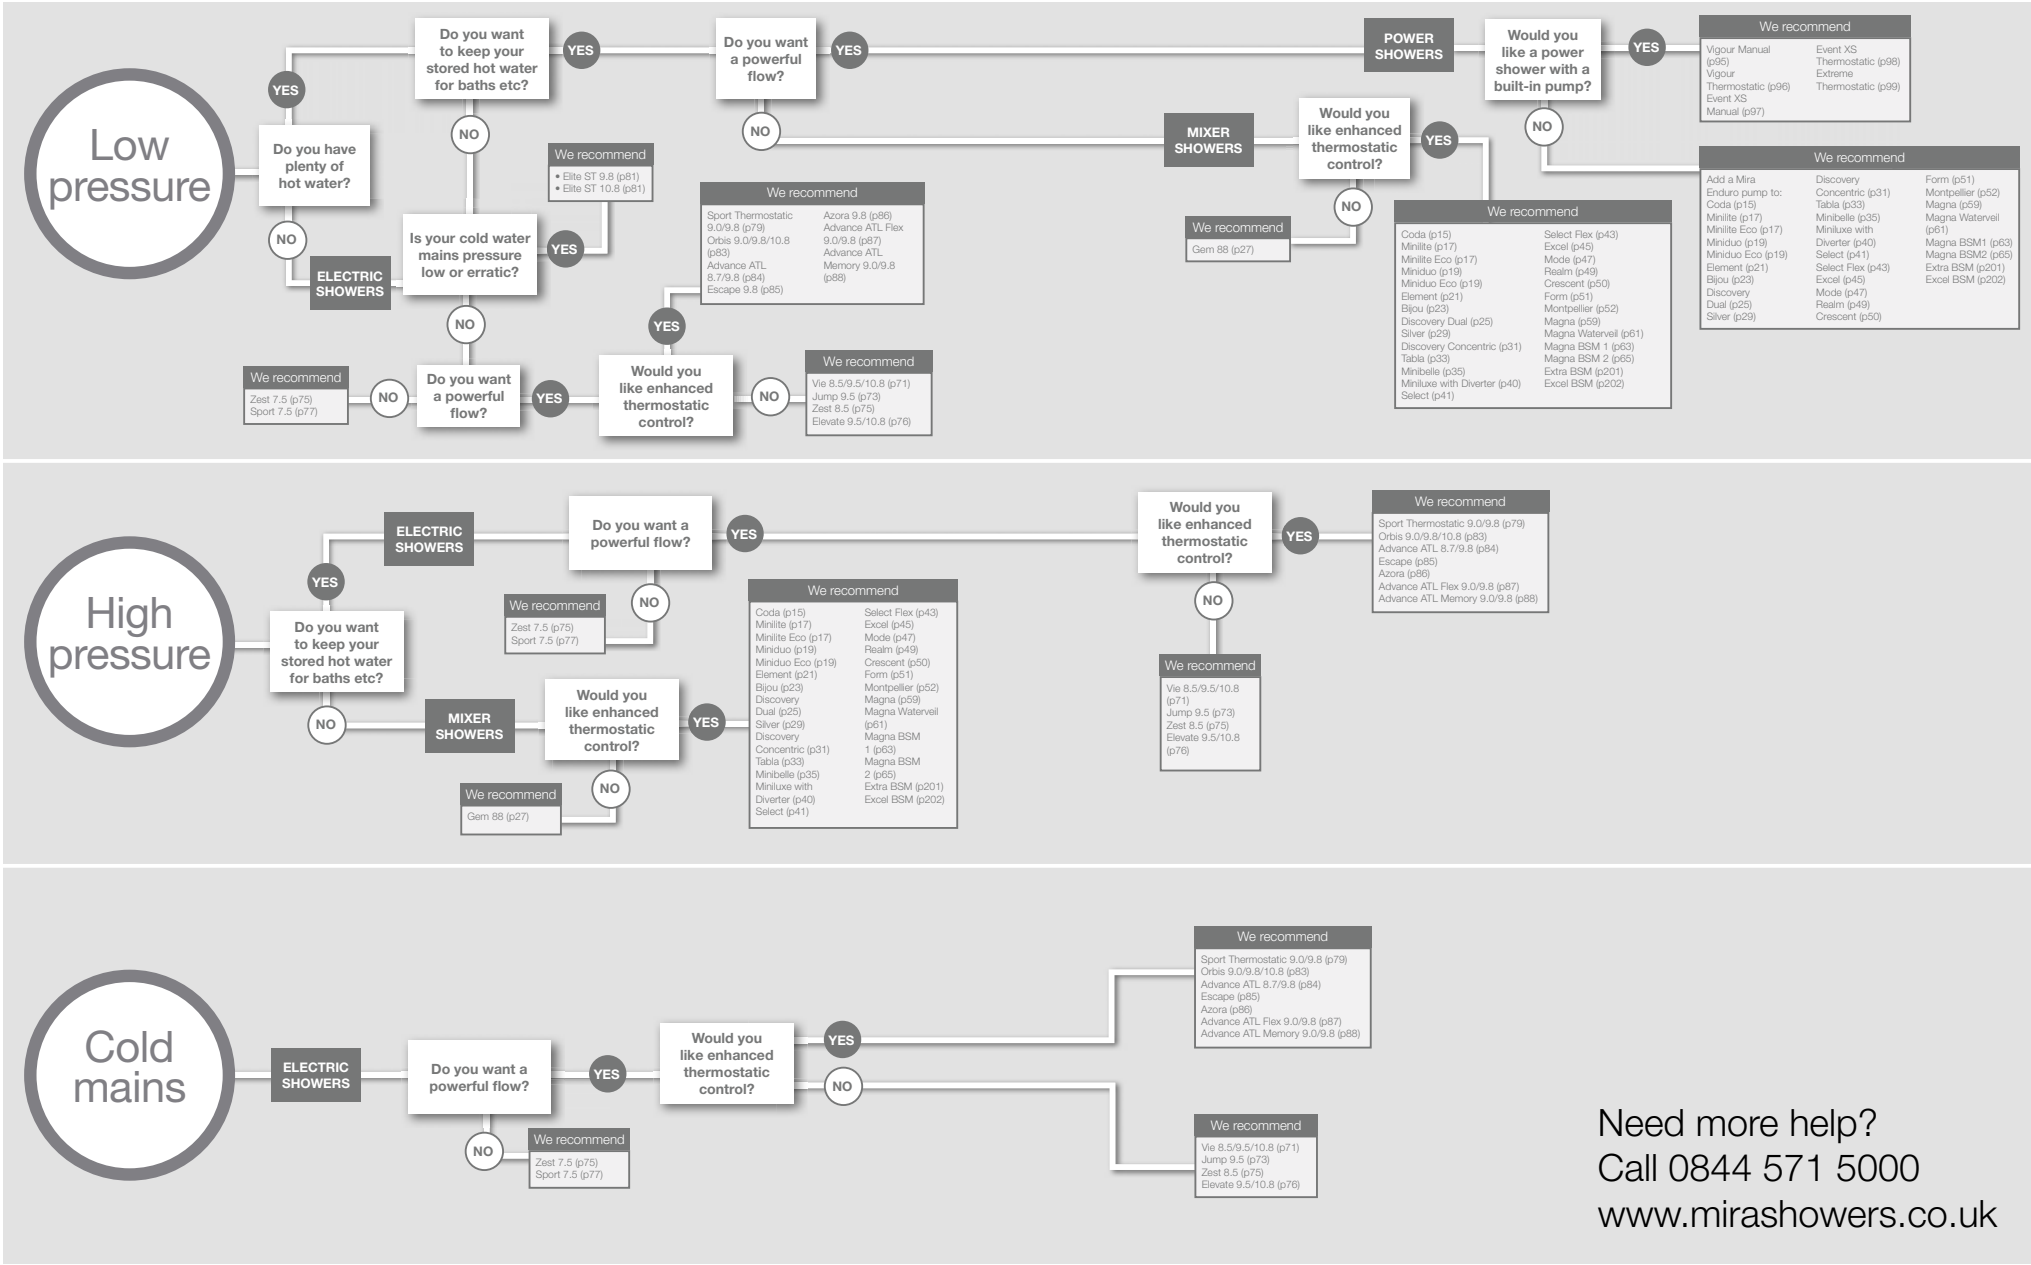
Eco showers

Our Eco showers use flow regulators to limit the maximum flow of water, and our Eco showerhead uses aerating technology to create the sensation of a normal, drenching flow while using a lot less water.

- Look for the BMA Water Efficiency logo and Waterwise marque

*If you're replacing an existing electric shower your installer will need to ensure that the installation complies with the latest wiring regulations.

Step 3: Our shower selector makes choosing easy



Need more help?
Call 0844 571 5000
www.mirashowers.co.uk

Mixer showers

Mixers showers use water from both your hot and cold supplies then mix it to create your perfect temperature.

They're ideal if you have lots of hot water on tap and, if you have a high pressure system, a mixer shower should give you a more powerful flow than an electric one. On the other hand, if you have a low pressure system, you can boost the flow by adding a Mira shower pump (see below).

To find out what water system you have, turn to pages 7-10. Most Mira mixers work on all the common UK water systems, but it's important to check before installation.

Which temperature control?

Mixer showers have 3 different types of temperature control:

Manual – your shower will not compensate for changes in the incoming supply temperature or pressure and the shower temperature may change.

Pressure balancing – if you have a pressure balancing mixer, it will compensate for any change in water pressure and give you a constant showering temperature, provided the supply temperature remains constant.

Thermostatic – a thermostat constantly monitors the incoming water temperature and makes adjustments to keep the temperature constant. Thermostatic controls give you great temperature control and are ideal for people who are at risk such as the very young or elderly.

Pressed for space?

mini size **maximum** performance

If space is an issue in your bathroom, look out for our 'Mini' symbol on the left. This highlights our range of 'Mini' showers, which bring you the powerful performance of a mixer but with smaller valves.

Low pressure water system?

The Mira Enduro shower pump is compatible with most showers, and helps to boost the water flow to create a stronger and more invigorating spray. Boost the flow of your mixer shower with the Mira Enduro shower pump £504.08 inc VAT RRP.

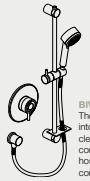
Overview - mixer showers

We've got a wide range of designs to choose from. Some of these designs are available in different configurations – EV, BIR, BIV, ER and ERD, so you can choose the style and configuration to suit you.

EV exposed variable
The shower control is mounted on the wall. Your shower comes with a showerhead, hose, clamp bracket and slide bar. Some models also come with a soap dish.

BIR built-in rigid
The controls and showerhead are both built into the wall. There's no hose or slide bar, so your shower has a minimalist look.



BIV built-in variable
The shower control is built into the wall for a smart, clean finish. The shower comes with a showerhead, hose, right-angled hose connector, clamp bracket and slide bar. Some models have a soap dish too.

ER exposed rigid
The shower control and showerhead are both mounted on the wall on a single riser bar.

ERD exposed rigid with diverter
The shower control and showerhead are both mounted on the wall on a single riser bar. The shower also has a second adjustable showerhead.

Exposed valve with bar valve fixing kit, chrome finish.

£193.87 inc VAT RRP

Easy to fit optional extras

Bar Valve Exposed Pipework Installation Elbows
The solution for installing any bar valve with exposed pipework:
- Fits any bar valve
- Built-in adjustability
- Easy to install and service
- Can accommodate pipework from any direction
- Concealed wall mounting

£37.60 inc VAT RRP

Bar Valve Fixing Kit
The fastest, easiest and most flexible way to install any bar valve:
- Fits any bar valve
- Built-in adjustability
- Easy to install
- Provides a solid wall fixing, even with loose pipework
- Watertight fit with the tiles

£47.00 inc VAT RRP

Product features

- Thermostatic temperature stability keeps showering safe for all the family
- A maximum temperature stop enhances safety – you can override it if you want a hotter shower
- Separate temperature and flow controls let you fine tune your perfect shower
- Three spray showerhead with rub-clean rubber nozzles makes cleaning easy
- You can buy separate accessories to make installation even easier
- All models come with a clean chrome finish

Mira Minilite & Mira Minilite Eco

Mini size, maximum performance. Beautifully compact, but with a powerful punch, the thermostatic technology and simple to use single controls on the Mira Minilite range make it ideal for all the family.

All systems | 3 Year guarantee | 1 spray pattern | Thermostatic | Start

Choose from the following configurations:

mini size **maximum** performance

Mira Minilite EV
Exposed valve with adjustable fittings, chrome finish.
£211.50 inc VAT RRP

mini size **maximum** performance

Mira Minilite EV Eco*
Exposed valve with adjustable fittings and 6L flow regulator, chrome finish.
£211.50 inc VAT RRP

mini size **maximum** performance

Mira Minilite BIV
Built-in valve with adjustable fittings, chrome finish.
£223.25 inc VAT RRP

mini size **maximum** performance

Mira Minilite BIV Eco*
Built-in valve with adjustable fittings and 6L flow regulator, chrome finish.
£223.25 inc VAT RRP

Product features

- Thermostatic temperature stability keeps showering safe for all the family
- One single control for flow and temperature creates a clean, minimal look
- Single spray showerhead with rub-clean rubber nozzles makes cleaning easy
- Minilite Eco EV and BIV are approved by the BMA and Waterwise as water efficient products – saving up to 50% water compared to the standard Minilite
- EV models come with 110mm pipe centres. If your existing pipework is between 133-153mm you can buy an optional extended elbows pack
- Can be fitted to falling, rising and rear water supplies
- Approved to TMV2 standards, which means you know its thermostatic control is the very highest quality**
- All models come with a clean chrome finish

* Our Eco showers only work on systems with at least 0.5 bar pressure.
** Our Eco showers are not TMV2 approved because of the flow regulator.

Mira Miniduo & Mira Miniduo with Eco Showerhead

Mini size, maximum performance. Beautifully compact, but with a powerful punch, the thermostatic technology and dual controls on the Mira Miniduo range make showering safe and exhilarating for all the family.

Choose from the following configurations:

mini size **maximum performance**

Mira Miniduo EV
Exposed valve with adjustable fittings, chrome finish.
£253.80 inc VAT RRP

Mira Miniduo BIV
Built-in valve with adjustable fittings, chrome finish.
£266.73 inc VAT RRP

mini size **maximum performance**

Mira Miniduo BIV with Eco showerhead*
Built-in valve with adjustable fittings, chrome finish.
£285.53 inc VAT RRP

mini size **maximum performance**

Mira Miniduo BIR with Eco showerhead*
Built-in valve with fixed showerhead, chrome finish.
£278.48 inc VAT RRP

Product features

- Thermostatic temperature stability keeps showering safe for all the family
- Separate temperature and flow controls let you fine tune your perfect shower
- Four spray showerhead** with partial rub-clean rubber nozzles makes cleaning easy
- Mira Miniduo with Eco Showerhead is approved by the BMA and Waterwise as water efficient products – saving up to 75% water compared to the standard Mira Miniduo at 0.5 bar pressure
- EV models come with 110mm pipe centres. If your existing pipework is between 133-153mm you can buy an optional extended elbows pack
- Can be fitted to falling, rising and rear water supplies
- Approved to TMV2 standards, which means you know its thermostatic control is the very highest quality***
- All models come with a clean chrome finish

* Our Eco showers only work on systems with at least 0.5 bar pressure.
** Except Mira Miniduo with Eco Showerhead which has three spray patterns (excluding 'Eco' setting) and full rub-clean nozzles.
*** Our Eco showers are not TMV2 approved because of the flow regulator.

Mira Element

Bringing both thermostatic temperature and flow control onto one simple to use dial, the Mira Element makes showering beautifully simple and stunningly affordable.

Choose from the following configurations:

Mira Element EV
Exposed valve with adjustable fittings, chrome finish.

* Please note: When choosing the Mira Montpellier 8" and 12" deluge head, you must make sure you have at least 0.2 bar pressure – please check with your installer. The Mira Montpellier with 12" deluge head is not suitable for combination boilers.

Digital showers

Digital showers are similar to mixer showers as they take water from both your hot and cold water supplies and then mix it to give you your ideal temperature.

However, there's one crucial difference. A digital shower uses a separate mixer unit and shower controls so you can mount the slim mixer unit away from the shower in an area which has easy access for servicing, such as a loft or even under some baths. This reduces the amount of pipework needed to install the shower, and means the shower controls take up less space in your shower area.

Our digital showers also come with a range of additional features:

- A special lock-off so you can prevent the shower being used.
- A warm-up feature, which gently heats the water to your ideal temperature, then switches the flow off until you're ready to get in.
- A timing feature, so you can set your precise showering time, saving energy and water.

How to buy your digital shower

You can buy your digital mixer and shower control as separate items or together in our convenient combination packs. If you're buying separately, simply follow these steps:

Step 1 – choose the digital mixer valve that suits your water system

If you want to go digital with your shower, you'll need to buy a digital mixer unit. This is the intelligent control unit that mixes the water and supplies it to the shower control. You can either choose a high pressure valve, or a pumped digital mixer valve for low pressure, gravity fed systems.

Step 2 – choose your shower controls

Mira Magna UV **Mira Magna BIR** **Mira Platinum**

If you'd like a minimalist look, we suggest a Mira Magna UV or BIR. Alternatively you might be looking for a larger showerhead, in which case we recommend a Mira Magna Waterveil. You can even choose a digital shower control that fills your bath too.

Step 3 – decide whether you want remote control

Some of our digital mixers are available with a remote control, for the ultimate in showering convenience.

Digital shower contents

Mira Platinum	57-58
Mira Magna	59-60
Mira Magna Waterveil	61-62
Mira Magna bath shower mixer 1 control	63-64
Mira Magna bath shower mixer 2 control	65-66

Overview - digital mixer showers

We've got a range of stylish digital shower controls to choose from, including BIR, UV, Bracket, Bar and bath fill options. Whichever design you choose, remember that you'll need a digital mixer unit to make it work. If you would like more information on our digital mixer range please call us on 0844 571 5000 or visit www.mirashowers.co.uk

BIR – built-in rigid
The controls and the showerhead are both built into the wall. With no hose or slide bar, it gives you a stylish minimalist look.

UV universal
Universal fittings are exclusive to the Mira Magna range and allow connection either through the ceiling or through the wall. They come with a showerhead, as well as a slide bar and clamp bracket.

Waterveil bracket
The shower control is mounted on the wall, and your shower comes with a 17cm Waterveil showerhead, showerhead wall bracket, hose, right-angled hose connector and soap dish.

Waterveil bar
The shower control is mounted on the wall, and your shower comes with a 17cm Waterveil showerhead, showerhead bracket, hose, right-angled hose connector, slide bar and soap dish.

- Don't step in until it's just right, with a shower warm-up facility and indicator

Electric showers

Electric showers use water from your mains cold water supply only, so chances are an electric shower would suit your home. They heat the water when you turn the shower on, passing it over a built-in heating element - similar to how a kettle works.

One reason to choose an electric shower is that it won't use up any of your stored hot water. So, if you have a limited supply of stored hot water, or you want to use it for something else, like a bath perhaps, an electric shower really makes sense. It's also ready to use any time of day or night.

Which temperature control?

Electric showers can come with 4 different types of temperature control:

Pressure stabilised – minimises temperature changes to ensure a consistent showering temperature, even if someone flushes the loo.

Advanced pressure stabilised – these showers control your showering temperature in a similar way to pressure stabilised models, but they also feature Opti-flo™ technology which gives you a wider selectable flow rate range. This means you can enjoy the full power of the shower even in the summer months when the incoming water temperature is higher.

Thermostatic – ensures that the temperature always stays to within +/-2 degrees, a safety feature that makes these showers ideal for those who have young or elderly family members.

Advanced thermostatic – the ultimate in safe showering. These showers utilise electronic technology to ensure that the showering temperature will always be consistent to within +/- 1 degree. All of the showers in our Mira Advance ATL range have been awarded the BEAB Care marque accreditation, which makes them ideal for the healthcare sector.

What are the key technologies?

Sensi-flo™ – prevents scalding in the event of a loss of water pressure or if the showerhead or hose become blocked.

Clearscale™ – incorporates DualElement™, phased shutdown and rub-clean nozzles to cut limescale by half so the shower performs better and lasts longer.

Opti-flo™ – gives you a wider selectable flow rate range which means you can enjoy the full power of the shower even in the summer months when the incoming water temperature is higher.

DualElement™ – Mira's patented DualElement™ heater tank runs at cooler temperatures than conventional technology providing constant power throughout the element which reduces "hot spots" where limescale can accumulate.

Water-saving showers

All our electric showers meet the strict criteria set out by the Bathroom Manufacturers' Association (BMA) for using water efficiently.

Overview - electric showers

We've got a wide range of electric showers to choose from, which are available in different kilowatt power ratings. Look for a higher kilowatt rating if you want a more powerful flow. All of our electric showers are approved by the BMA as being Water Efficient. If you would like more information on any of our electric range please call us on 0844 571 5000 or visit www.mirashowers.co.uk

- Available in a 9.8kW power rating

Power showers

Nothing beats the exhilaration of standing under a truly drenching flow of cleansing water. Power showers from Mira come with an internal pump to boost the flow and give you a shower that delivers this stunning experience every single time.

Power showers mix water from both your hot and cold supplies to give you your ideal temperature. If you've got a plentiful supply of hot water in your home, a power shower could be ideal.

If you'd like a powerful flow but would prefer a mixer shower, you can install a separate shower pump – see page 12 to find out more.

Which temperature control?

There are 2 different types of temperature control available with power showers. Simply choose the one that you'd be happiest with – you can see which shower comes with which type of control over the following pages.

Manual – your shower will not compensate for changes in the incoming supply temperature or pressure and the shower temperature may change.

Thermostatic – gives you great temperature control and are ideal for people who are at risk such as the very young or elderly.

white/chrome finish.
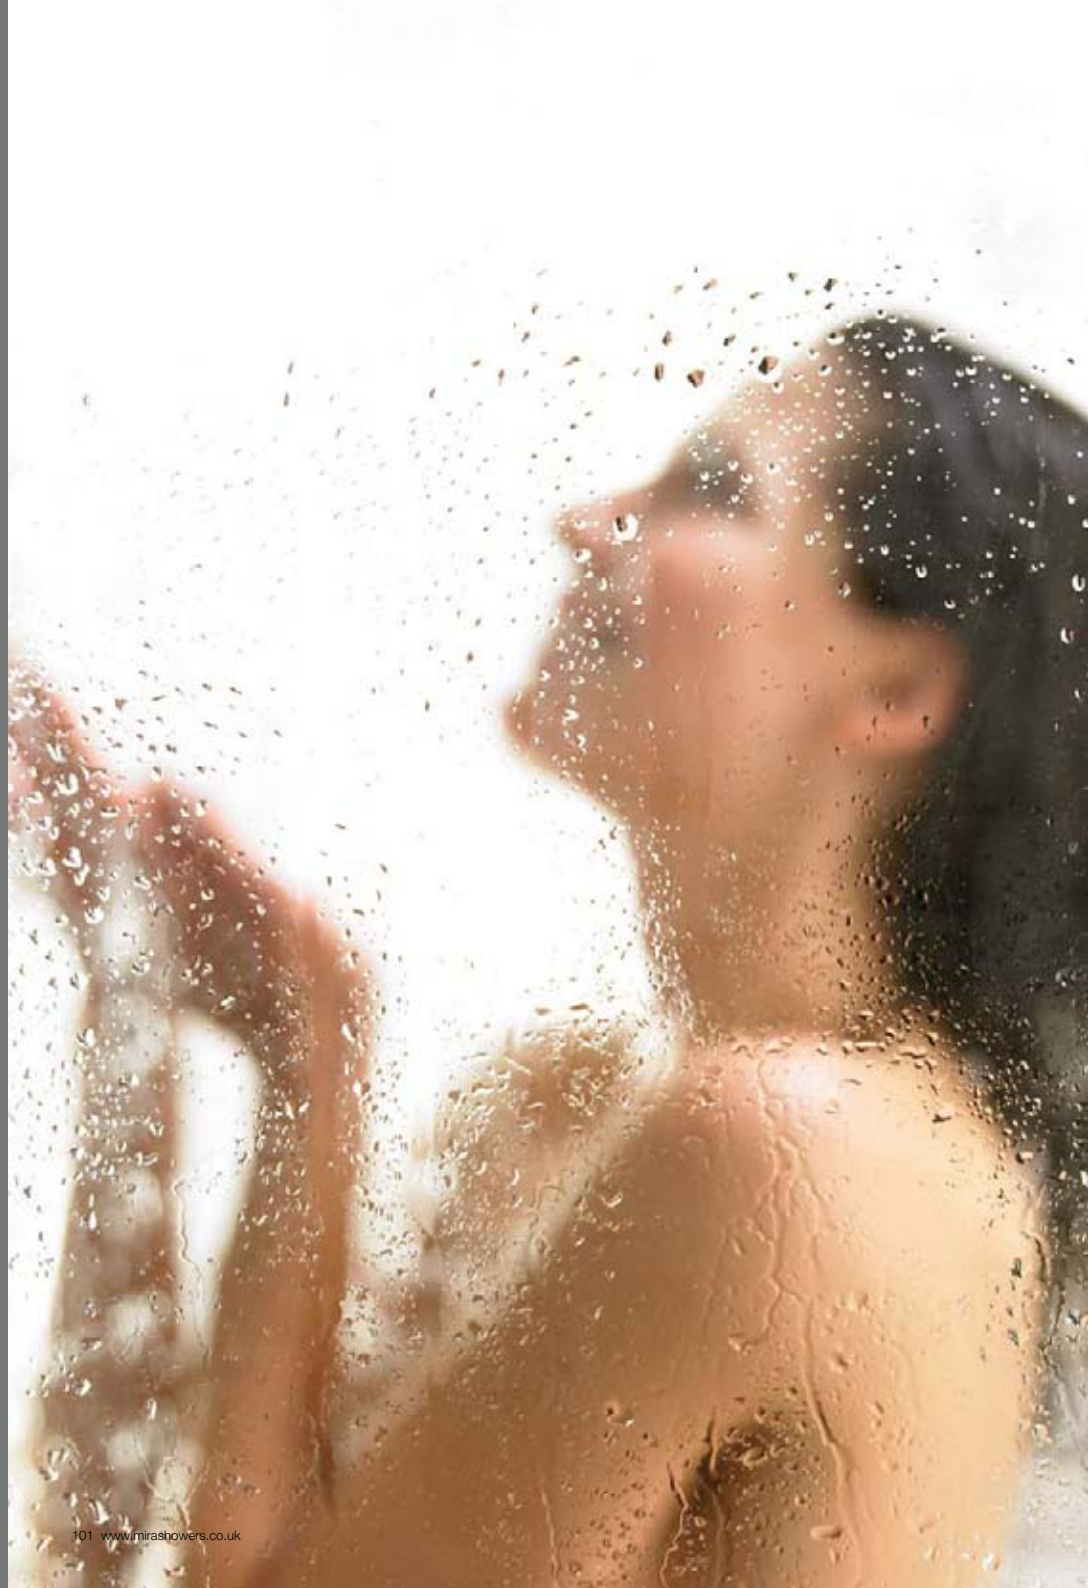
£522.88 inc VAT RRP

Product features

- Thermostatic temperature stability keeps showering safe for all the family
- Separate temperature and flow controls let you fine tune your perfect shower
- Push button controls are so easy to use
- Four spray showerhead with partial rub-clean rubber nozzles makes cleaning easy
- Delivers an invigorating flow of up to 16 litres of water a minute
- Comes in a stylish white/chrome finish



Mira Flight ACE shower enclosures

Robust and easy to install, Mira Flight ACE shower enclosures give watertight confidence in a simple strong design.

Thoughtfully engineered design details ensure durability and longevity and provide maximum flexibility on your installation with up to 29mm of adjustment for uneven walls. Frameless doors provide a premium feel and a wide range of door types and size options available to deliver an enclosure to complement any bathroom. Our investment in research and development keeps us at the forefront of design and technology so we can provide our customers with flexible robust shower solutions to suit any bathroom.

Combining design and technology

Planet gear

The planet gear mechanism, found on the bi-fold model, ensures correct alignment leading to a consistent smooth action. Magnetic strips along the top and bottom of the door ensure a strong consistent closure.

Double rollers

The double rollers on the sliding quadrant and corner entry doors provide a smooth consistent gliding action to give a high quality feel and performance throughout the product's life.

Unique design details

The high quality finish, achieved in-house, provides a premium feel to any bathroom.

Adjustable ball catch

The adjustable ball catch used on the pivot door, offers additional installation flexibility and performance. The catch can be adjusted to provide a high quality feel throughout the product's life.

How to choose your Mira Flight ACE alcove or corner shower enclosure

Whatever you're looking for in a shower enclosure, it can be found within the new Mira Flight ACE enclosure range. But which is right for you? Just follow these 3 simple steps:

Step 1 - preparation

Measure the width of your shower door but importantly also measure the space available in the bathroom to get in and out, and for the door to open.

Step 2 - choose your location

Are you installing the door in an alcove or corner site?

Step 3 - alcove: choose your door type

N.B. Remember to check that the door opening is wide enough for your needs

Pivot door - offers the widest opening for a given size of enclosure – just make sure that there is space in the bathroom for the door to open. Remember the door is reversible so can open to the left or right.

Bi-fold door - ideal if there is not enough space in the bathroom for a pivot door as the door folds inwards. May not be the best solution if your mobility is limited as you will need to move out of the way of the door to open it.

Slider - another door that does not intrude into the bathroom space and provides a very easy to use solution for widths of 1000mm

Step 3 - corner enclosure: choose your door type

N.B. Don't forget to order a side panel as well as a door to complete the enclosure. Remember to check that the door opening is wide enough for your needs.

Pivot door - offers the widest opening for a given size of enclosure – just make sure that there is space in the bathroom for the door to open. Remember the door is reversible so can open to the left or right.

Bi-fold door - ideal if there is not enough space in the bathroom for a pivot door as the door folds inwards. May not be the best solution if your mobility is limited as you will need to move out of the way of the door to open it.

Slider - another door that doesn't intrude into the bathroom space and provides a very easy to use solution for widths of 1000mm and over.

Quadrant - a very space efficient solution with its double sliding doors and elegant curved shape.

Corner entry - a space efficient square enclosure with double sliding doors giving more room for bathroom furniture and accessories near the showering area.

Mira Flight SFE shower enclosures

The Mira Flight SFE range provides contemporary styling, whilst the 6mm toughened safety glass ensures the enclosure offers the quality you would expect from Mira.

The exciting designs combine exceptional performance with ease of installation, designed to work in perfect harmony with our Flight trays to ensure you create the shower area of your dreams.

The Flight SFE enclosure range offers you over 18 style combinations so you are certain to find the right enclosure for your shower area. From large walk-in designs to smaller corner areas suitable for your restricted en-suite space, Mira have thought of everything.

Combining design and technology

Our investment in research and development keeps us at the forefront of design and technology so we can provide our customers with the ultimate shower area solution.

Slide & lock

A unique and patented 29mm 'slide & lock' adjustment system is featured in the wall profile. This allows the glass to be adjusted for out of true walls then locked into position using an allen key, so there is no need to drill the frame. The glass can then be repositioned with ease.

Pivot blocks

Quality pivot blocks add to the robustness of the enclosure yet are in keeping with the minimal styling and ingeniously incorporate our 'slide & lock' system to provide the adjustment required for a quality fit.

Filler section

An 18mm filler section can be used to give additional installation flexibility. Available in silver for use with all Flight SFE doors, side panels and enclosures.

For your peace of mind

With power shower approval you can say goodbye to a wet bathroom floor whilst the 6mm toughened glass will not only look luxurious it will offer greater safety for your whole family.

As the UK's leading shower manufacturer our excellent reputation is extremely important to us. We are passionate about our customers and keeping them happy. Choosing the complete shower package from our range will give you the peace of mind you deserve, allowing you to enjoy the creation of your new shower area.

How to choose your perfect shower enclosure

Whatever you're looking for in a shower enclosure, it can be found within the new Mira Flight semi-frameless enclosure range. But which is right for you? Just follow these 4 simple steps:

Step 1 - preparation

Are you installing your shower into an alcove or corner?

Step 2 - choose your location

Measure the space available for your shower door or enclosure but importantly also measure the space available in the bathroom to get in and out, and for the door to open.

Step 3 - choose your shape

Walk-in - a very elegant solution for a large space. The 1700x700 walk-in can be an ideal bath replacement option.

Square/rectangle - our widest range of sizes. Pair a pivot, bi-fold door or sliding door with a choice of 3 side panels to create an enclosure that perfectly fits the available space.

Pentagon - gives more usable space in the bathroom as the door opening is central allowing bathroom furniture to be located close to the enclosure walls on both sides.

Quadrant - a very space efficient solution with its single sliding door. This enclosure is left/right handed so make sure you select the correct one to fit your bathroom.

Step 4 - choose your door type

Walk-in - a walk-in enclosure has no door at all so you can just walk straight in and shower. Remember that there will always be some water splashing on the floor with a walk-in.

Pivot door - offers the widest opening for a given size of enclosure – just make sure that there is space in the bathroom for the door to open. Remember the door is reversible so can open to the left or right.

Bi-fold door - ideal if there is not enough space in the bathroom for a pivot door as the door folds inwards. May not be the best solution if your mobility is limited as you will need to move out of the way of the door to open it.

Sliding door - another door that doesn't intrude into the bathroom space and that provides a very easy to use solution for widths of 1000mm and over. Check that the door opening is wide enough for your needs.

Double sliding door - excellent option for a large space offering easy access and maximising the showering area. Being a sliding door it doesn't intrude into the bathroom space.

Mira Flight trays

Mira Flight is a shower tray that will never ever let you down – lighter, stronger, easier to fit and it's incredibly strong. Mira Flight always keeps its colour, staying in perfect harmony with your bathroom décor.

Clean and fresh forever with innovative BioCote® technology

Every Mira Flight tray stays protected for its whole lifetime thanks to the innovative antibacterial technology BioCote® which is incorporated into the manufacturing process itself.

- Reduces bacteria and mould by up to 99.9%.
- Already specified in healthcare sector.
- Unlike other protection, BioCote® will never wear off or wash away.

Completely watertight

Flight has thinner, stronger upstands so you'll enjoy maximum protection against leaks, giving you complete peace of mind.

Mira Flight Low trays

Made from durable acrylic resin stone, Mira Flight Low isn't just incredibly tough and unbelievably light, it's also one of the lowest trays on the market.

The lighter, tougher and lower shower tray

At just 40mm as opposed to the standard 90mm height, it's ideal for creating a minimalist 'wet room' look.

Mira Flight Low also includes BioCote® protection and should be fitted with a Mira Flight Low vortex waste.

Flight Low range, 4 shapes, 27 sizes and all with a 10 year guarantee.

Extremely light – lighter than comparable acrylic capped resin stone products on the market.

Easier to fit – for solid floors, an optional riser conversion kit comes complete with simple push fit legs that make the upgrade to a riser tray easy. The legs and panels are especially designed to keep the low profile look.

Fast and efficient – the Mira Flight Low vortex waste literally sucks the water through the trap so the tray doesn't flood even with the most powerful shower*. In addition, the vortex action resists blockage.

BioCote®

Mira Flight wall panels

Why not complete your installation the easy way by using the new Mira Flight wall panels. Easy to install, the Mira Flight wall panel works perfectly with both the new Mira enclosures and the acclaimed Mira Flight trays.

All Mira Flight walls stay protected for life with the antibacterial technology BioCote® which is incorporated into the manufacturing process itself.

- Reduces bacteria and mould by up to 99.9%.
- Unlike other protection, BioCote® will never wear off or wash away.

Mira design and technology

Flight walls are designed to complement the Mira Flight shower trays and are available in gloss white to offer a stylish contemporary finish to your bathroom. The walls are strong, durable and leak proof using patented Mira Flight technology so you can enjoy years of showering.

Accessories

Perhaps you want to give your bathroom a makeover, or you'd simply like to replace an old shower part. At Mira we offer a wide range of accessories that are easy and simple to fit.

From showerheads that use less water to stylish soap dishes, you'll find whatever you're looking for here and most of our range will fit other makes and models of shower. So even if you're not lucky enough to currently own a Mira, you can still refresh your shower.

Experience the very latest in showering technology

Our design teams are constantly developing new and innovative showerheads to bring you an even better showering experience:

- Mira Eco is a water-saving showerhead that can help you save up to 75%* of the water you use when you shower, without noticing any difference to the flow.
- Mira Everclear is specially designed to stop limescale building up, so your showerhead gives a consistent flow and has a longer life.
- Pictured on the left, the Mira 360 is a brand new type of showerhead that literally turns showering on its head, bringing you a simple flip action to create four unique and invigorating sprays.

If you live in the UK, you can now purchase your shower fittings or accessories direct from Mira, at recommended retail prices (RRP). To place an order please visit our website www.mirashowers-store.co.uk or call us on 0844 571 5000 (UK only Monday - Friday 8.00am - 5.30pm and Saturday 8.30am - 3.30pm).

*When compared to a Mira Logic showerhead at 0.5 bar pressure. Mira Eco is not suitable for electric showers or gravity fed systems under 0.5 bar pressure.

Saving water by 75%†
Saving water is good news for the environment and for your utility bills too. Choose a Mira Eco showerhead and you'll know you're using water as efficiently as possible, thanks to our groundbreaking technology. By delivering larger water droplets filled with air, Mira Eco creates a great showering sensation, while actually cutting the amount of water used by up to 75%†, so you don't have to compromise on that exhilarating Mira feeling to do your bit for the environment.

Fitting a Mira Eco showerhead to your shower means you'll also save on the fuel bills, as there's less water to heat.
Not only that, Mira Eco also comes with special 'wipe-clean' nozzles to keep limescale at bay.

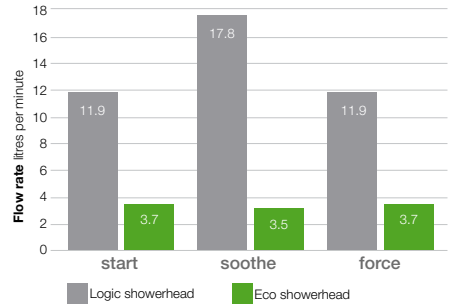
Save water whatever your flow
Our water-saving technology works across all 3 of Eco's spray patterns. So whether you prefer a gentle spray or a concentrated flow, you're still saving water and heating costs.

† When compared to a Mira Logic showerhead at 0.5 bar pressure.
* Mira Eco is not suitable for electric showers or gravity fed systems under 0.5 bar pressure.

Mira Logic showerhead

Mira Eco showerhead

Flow rates at 0.5 bar
Logic showerhead vs. Eco showerhead



The Mira Eco showerhead uses on average 10.2 litres per minute less than the Mira Logic showerhead.

Mira Eco has been awarded the Waterwise Marque. Waterwise is the leading authority on water efficiency in the UK and each year they award the Marque to products that reduce water wastage or raise awareness of water efficiency.

We received a Gold Award for Mira Eco at the House Beautiful Awards 2009 which celebrates the best homes and interiors products. The innovative showerhead was named Eco Product of the Year for its environmentally friendly design.

Mira Everclear

The Mira Everclear showerhead fights limescale. Its unique design resists limescale build up with automatic self drain and integrated pins for easy cleaning of the nozzles.

Self cleaning technology
Over 60% of the population is affected by hard water. This often results in limescale build up, which doesn't just leave ugly marks on your shower, it can also clog up the nozzles which restricts the spray.

Mira Everclear features innovative technology which means the showerhead drains automatically before any limescale has time to build up.

When showering begins, the spray plate automatically pushes forward giving a comfortable wide spray. Turning off the water will automatically allow the spray plate to retract to the rest position. The showerhead drains away any residual water and small pins come through the spray plate to ensure it is cleared thoroughly, reducing any limescale build up. The spray plate can also be manually pressed for an extra clean if necessary.

Ideal for mixer showers
We designed Mira Everclear to be simple to fit. It's suitable for most mixer showers over 0.2 bar pressure, and electric showers over 9.0kW. We've got a range of finishes and models to choose from, so you can find the showerhead or fittings kit that matches your existing shower perfectly.

* Suitable for most mixers over 0.2 bar pressure and electric showers over 9.0kW.

Taps & bath shower mixers

Our taps have been designed to match perfectly with the Mira Excel and Mira Discovery mixer showers, but they will also look great with most of our contemporary range. We've also got a selection of bath shower mixers (see pages 201-202) which combine bath fill and an invigorating shower in one simple to use control. If you would like more information on our taps and bath shower mixers please call us on 0844 571 5000 or visit **www.mirashowers.co.uk**

Mira Extra bath shower mixer

A thermostatically controlled shower combined with bath fill and a choice of three spray patterns for practical and enjoyable showering. An easy-to-install alternative to a wall-mounted shower, the Mira Extra connects directly to your bath water supply.

Mira Extra bath shower mixer with adjustable showerhead
Power shower, white finish.
£592.20 inc VAT RRP

Product features

- Thermostatic temperature control ensuring a constant and comfortable showering experience
- Separate flow and temperature controls
- Conventional non-thermostatic bath-fill via independent hot and cold tap heads
- Three spray showerhead with partial rub-clean rubber nozzles for easy cleaning
- For installation on the top of the bath

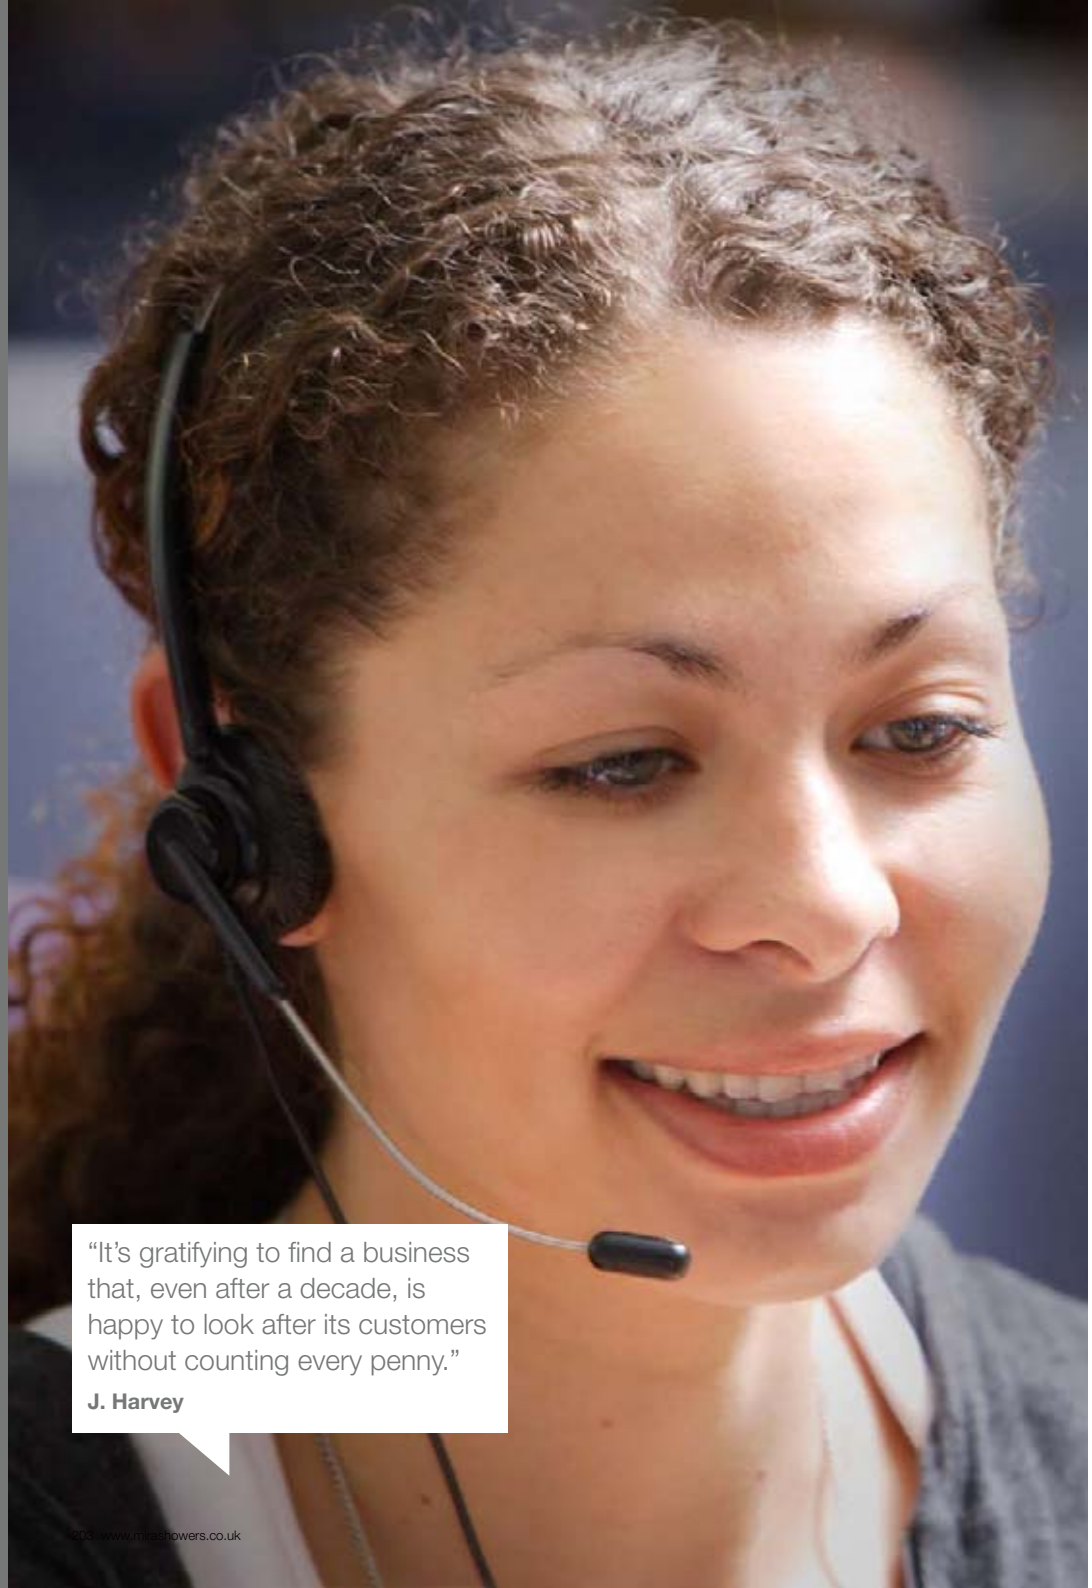
Mira Excel bath shower mixer

The Mira Excel BSM is the first ever to feature thermostatic control for both shower and bath fill. Fill your bath or run the shower and relax knowing everything is totally safe. The easy to use lever controls also make it easy to switch from bath to shower.

Mira Excel bath shower mixer with adjustable shower head
Power shower, white finish.
£594.55 inc VAT RRP

Product features

- Thermostatic temperature control ensuring a constant and comfortable showering experience
- Separate flow and temperature controls
- Automatic maximum temperature reduction when user switches from bath to shower mode
- Four spray showerhead with rub-clean rubber nozzles for easy cleaning
- Unique inner sleeve reduces surface temperature for even more safety
- Approved to TMV2 standards – the highest domestic accolade for thermostatic temperature stability
- For installation on the top of the bath



"It's gratifying to find a business that, even after a decade, is happy to look after its customers without counting every penny."
J. Harvey

We're here to help. Get in touch whenever you need us.

If you're thinking about buying a Mira shower, or you already have a Mira but need a bit of help or advice, we're just a phone call away. Perhaps you need help working out what water system you have. Or, you might need a spare part or want us to arrange a visit from a service engineer. Whatever help you need, the good news is that when you buy a Mira, you can count on our dedicated Customer Services Team to provide lifetime support for your product.

How to get help over the phone

It goes without saying that you'd prefer to talk to a friendly human being rather than working through an automated system or listening to tedious hold music. That's why we answer 85% of all calls within 15 seconds. All our Customer Service representatives are fully trained in Mira products, and do at least 150 hours of extra training every year. We make sure they know every Mira product inside out, so they'll be able to help whatever question you have. If you'd like to speak to us over the phone, feel free to call on **0844 571 5000**.

We take service seriously

We know our excellent reputation depends on the service we provide. That's why we're always working to make our service second to none. It's also why we're the only shower manufacturer that's a member of the Institute of Customer Service.

The Institute of Customer Service is the professional body for customer service, whose primary purpose is to lead customer service performance and professionalism. We have a strong commitment to continuous improvement of customer service, and we're the only shower manufacturer with membership to the ICS.

How to find help and advice online

Our website **www.mirashowers.co.uk** puts you in touch with lots of useful information and advice at the click of a mouse:

- Use our online tools to identify your water system or choose your ideal shower.
- Compare the benefits of our showers by using our 'compare and select' feature.
- Look up any technical terms you don't understand in our glossary or check our Frequently Asked Questions.
- Watch our handy installation videos.

You can also view or download our installation and user guides for all our products, as well as a technical brochure. Once you've bought a Mira you can also register your guarantee quickly and easy using the simple online form.

How to arrange a visit from an engineer

"What a total delight to be dealt with immediately I called, no answer machine, efficient and friendly from the first call to the problem being solved by the engineer within minutes of him coming to the house. I really should like to say a very big thank you for restoring my faith in true service."

M Crisp

If you ever need hands-on help with your Mira, we can send an engineer out to you. Even if your warranty has expired, you can still call on us. We only charge by the visit and not by the hour, so you know you're getting good value for money.

- We aim to visit you with 3 working days of receiving your call.
- We should get your problem fixed the first time we come out.
- We can send spare parts to you within 2 working days of your call (as long as we have them in stock).

At the end of the day, we make sure the service we provide is to the same high standards as the products we make. With Mira you know you'll always enjoy the best of both worlds.

If you live in the UK or Northern Ireland and need help or advice, or you want to report a fault with a Mira product please call us on 0844 571 5000.

"Just to thank you for your superb service. In today's automated push-button options world, how refreshing to be able to speak to someone who will deal with the problem and see it through to completion."

D. Hopton

Getting in touch
